### NEW HYBRID PLUMS

Life size reproduction of one of our new  
Japan-American Hybrid Plums  
60 trees 3-5 ft. for \$10.00

*A Special Bargain in*

## HARDY HYBRID PLUM TREES

Would you like to grow bushels and bushels of fine quality plums for eating from the trees and for canning and preserving, provided you can get the trees at a very small outlay?

In going over a block of Hybrid Plum trees grown from hand picked fruits of our fourth and fifth generation Japan-American Hybrid Crosses, we find we have more of the trees than we have room for in our testing orchards, where we had planned to set them. We would not sell these trees outright where we would lose track of them as there are sure to be some wonderful new varieties among them. Each tree will bear different fruit, some red, some yellow and blue and all shades between. So far our largest plum in these hybrids measured 6 1-4 inches around, being as large as Burbank's largest California Prunes. The trees are iron-clads for hardiness and come into bearing very quickly. They are the culmina-

tion of 40 years work of scientific plum breeding started by our Mr. Charles F. Gardner and Prof. J. L. Budd, of Iowa Agricultural College at Ames.

Now if you have a good place to set some of these trees and will send us samples of the plums that measure over 5 inches around and supply us with a few grafting twigs from such of them as we wish to propagate, we will send you 5 dozen of these fine 2-year-old Japan-American Hybrid Plum trees, 3 to 5 feet tall, for \$10.00. Or if you do not have room for 5 dozen trees we will send you 1 dozen for \$3.00. We guarantee express not to exceed \$2.00 on the 5 dozen trees or over \$1.00 on the one dozen lot.

Just fill in order coupon below for number of trees you want. You can pay for them when they reach you in good condition.
